The above paper was published following a study done in the department of PMR at AIIMS and was based on the thesis of Dr V Sindhu, when she was pursuing her MD (PMR) at AIIMS. Dr Madan M Telikicherla significantly contributed for the conduct of the study. He was the inventor of this US patented device. He donated two sets of these devices, one below knee version and one above knee version to the department of PMR, AIIMS. He was kind enough to bring them from USA to India bearing the cost himself to the US manufacturer and also taking the trouble of carrying the prostheses with him. Not only did he donate these prostheses but he also contributed by way of demonstrating the fitting of the prosthesis to the patients. He also gave the background material and the related literature for the study to be conducted at AIIMS.

In the thesis of Dr V Sindhu, contribution of Dr Madan M Telikicherla was thoroughly acknowledged but these were somehow missed in the publication of the article in the journal. The authors wish to put on record their apology for this omission and sincerely acknowledge the contributions of Dr Madan Telikicherla.
